Giant Flowered Hyacinths

The Finest for Beds and Borders and for Growing Indoors

Enchantress—a typical spike of Burpee's
Giant Flowered Hyacinths

Among the many flowers that can be grown from fall-planted bulbs the Hyacinth stands at the top of the list. It is probably the easiest flower to grow in pots or bowls, and what could be more decorative or attractive than a display of Hyacinths in the house during the winter or early spring! Equally effective and beautiful are beds, borders or groups of Hyacinths here and there among perennials or in front of shrubbery.

The Hyacinth might be grown for its fragrance alone, but with its stately growth, showy flower-spikes and wide color range, it is a flower that is certainly everybody's favorite.

From a long list of named Hyacinths we have selected those offered on account of their free flowering qualities and distinct colors.

Mammoth Sized Bulbs

The spikes produced from Burpee's Mammoth Sized Bulbs will be truly Giant and well filled with large, showy florets. *Our Mammoth bulbs are carefully selected, of the highest quality and particularly desirable for beds, borders, pots or glasses, where the largest flower-spikes are wanted.*

9025 Dr. Lieber Lavender-blue shaded violet, the general effect being deep blue. Perfect spikes of giant size and robust habit.

9001 Duke of Westminster Deep purplish blue; a glorious shade, always admired. Large, broad trusses; erect and stately.

9004 Enchantress Beautiful light delft-blue shaded with somewhat deeper blue; large florets closely set on tall spikes.

9006 Gertrude Large, compact trusses of rich carmine-rose. Considered the best rose-colored Hyacinth for all purposes.

9007 Grand Maitre Rich, deep porcelain-blue; the florets are loosely placed in large trusses of bold, erect habit.

9009 King of the Blues Dark, glistening indigo-blue; very large, compact spikes. Has a pronounced, delightful vanilla scent.

9014 Lady Derby Giant, erect trusses of rich rose-pink; very striking and showy. A popular variety; always gives good results.

9012 La Grandesse Enormous spikes of the purest waxy white—an excellent and highly recommended white for all purposes.

9019 La Victoire Brilliant scarlet-red—a color that always attracts attention. Very large, compact trusses. Early flowering.

9023 L'Innocence Immense spikes of the purest white, and the earliest white for forcing.

9033 Queen of the Pinks Large, broad, very strong-stemmed trusses of bright rose-pink.

9029 Royal Scarlet (Tubergen's Scarlet) Bulbs and flower-spikes smaller than other varieties, but what they lack in size is more than made up in the bright, fiery scarlet color of the erect, stocky trusses.

9031 Yellow Hammer Compact, erect trusses of deep creamy yellow. Bulbs and flower-spikes somewhat smaller than others.

Large Flowered Hyacinths

For Beds, Borders, or Pots where medium sized spikes are preferred

If medium sized spikes are wanted for beds, borders, or pots, the Large Flowered Hyacinths offered below will be found most satisfactory. The bulbs are of Medium or the so-called Bedding size, which are smaller than those offered on the opposite page, and the flower-spikes which they will produce will also be smaller.

For the very largest spikes, either in pots or in the garden, plant the Giant Flowered Hyacinths offered on opposite page. **If size of spike is not important, plant the varieties listed on this page.**

Hyacinths are one of the easiest flowers to grow.

Outdoors: Plant the Mammoth bulbs 6 to 7 in. deep, 8 in. apart; the Bedding size bulbs about 5 in. deep, 4 to 5 in. apart.

Indoors: One bulb is usually planted in a 5- or 6-inch pot, depending on the size of the bulb, although 4 bulbs may be planted in a 6-inch pan or 6 in a 7-inch pan. Use only the Mammoth sized bulbs for growing in water in the house. French Roman Hyacinths should not be planted outdoors in cold sections; they are easily and quickly grown in pots in the house.

For full cultural directions of all fall bulbs, ask for Burpee Leaflet No. 31, "Bulbs for Winter and Spring Blooming."

Each bulb, although smaller than other Hyacinths, will produce 3 to 5 long, slender, loosely formed pure white flower-spikes, which are delightfully fragrant. For best effect, plant about 4 bulbs in a 5-inch pan. French Roman Hyacinths are not adapted for outdoor planting except in frost-free localities.

Narcissus or Daffodils

King Alfred
Always popular

In a general way, Daffodil and Narcissus mean the same thing; Daffodil is the common name and Narcissus the botanical name. Common usage among garden makers in this country has applied the term Daffodil to the large trumpet varieties, while the smaller or medium trumpet, as well as the Cluster-flowered and Poet's types, are referred to as Narcissus. Botanically these are the Barrii, Incomparabilis, Leedsii, Poeticus, Poetaz, Polyanthus and Miniature types. Some gardeners apply the name Jonquil to the large trumpet Daffodils, but this is misleading as Jonquils are small flowered, sweet-scented, have grass-like foliage and belong to the rush-leaved group of Narcissus.

We are listing the different classes separately, describing the distinguishing characters of each, and in so doing hope it will be of some help to you in selecting the varieties you want in your garden.

As Narcissus bloom early, last a long time, and may be had in so many lovely varied forms, they have few equals as garden flowers. They are most desirable for any garden purpose—in masses in beds or borders, in groups of 12 or more here and there in the hardy perennial border or in the foreground of shrubbery. For naturalizing in large quantities, no other flower is more suitable. Narcissus are also ideal, easily grown subjects for winter blooming in the house.

In descriptions we refer to the trumpet and perianth: the trumpet is the funnel-like center, the perianth the surrounding row of petals.

DAFFODILS

9470 Large and Medium Trumpet Choice Varieties Mixed

3 for 10¢; 33 for \$1.00; 100 for \$3.00.

In our advertisements this year we are making this special offer of Daffodils to make new friends; we repeat it here so that old friends, as well as new, may take advantage of this bargain. This offer does not apply to any other varieties.

For the most satisfactory results, plant Narcissus Bulbs outdoors as early in the fall as possible; if planted too late, they may not produce good flowers in the spring. Plant bulbs 4 to 8 in. deep and 6 to 10 in. apart, according to their size.

Large Yellow Trumpet Varieties

Flowers of the ever-popular Large or, perhaps better named, Long Trumpet Daffodils are very large, the trumpets being as long as, or longer than, the length of the perianth petals. Choice assortment of yellow, white and bicolor Large Trumpet Daffodils in mixture. Recommended for planting in beds, borders or naturalizing; ideal for cutting. 12 for 50¢; 100 for \$3.50; 1000 for \$32.50.

How to Grow Daffodils

Outdoors: Plant bulbs as early in the fall as they can be obtained, 4 to 8 in. deep and 6 to 10 in. apart according to their size. In very cold locations, after the ground is frozen hard, cover with leaves, straw or coarse litter to a depth of 4 to 6 in.

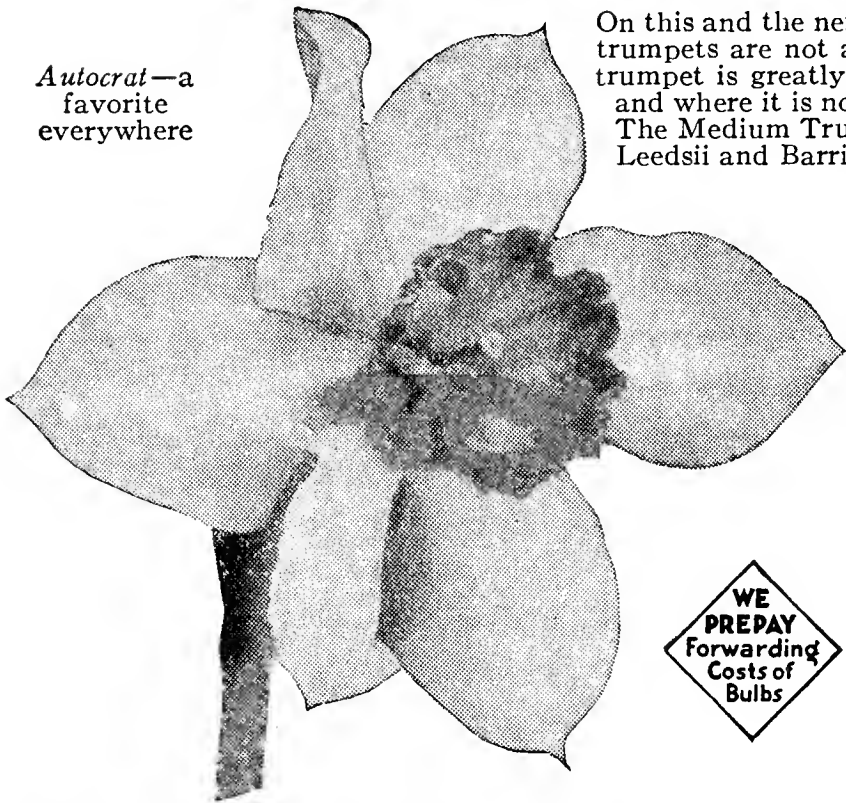

Indoors: Put several bulbs, about 1 in. apart (same variety), in a pot; cover with 1 in. of soil, water thoroughly, and put in a cold-frame or heel-in in the garden for 8 to 10 weeks to force root development before bringing indoors for winter blooming.

Beautify your early spring garden with Daffodils. Plant them in beds, borders, among perennials, in front of shrubs, open woodlands, meadows, or in shady nooks; they do well everywhere.

Medium Trumpet Daffodils

Autocrat—a favorite everywhere

On this and the next two pages, we offer a choice assortment of Daffodils whose trumpets are not as long as the perianth segments. In this group, where the trumpet is greatly reduced in size and flattened, we refer to it as a "crown," and where it is not flattened but quite small we refer to it as a "cup." The Medium Trumpet class is divided into three groups,—Incomparabilis, Leedsii and Barrii. These divisions are based mainly on the relation of the perianth to the trumpet, crown or cup; an explanation is given under each group as to what are the distinguishing characters.

Incomparabilis

Trumpets, crowns or cups measure from one-third to less than the length of the perianth segments. The largest red crowned varieties are found in this group.

9432 Bernardino Creamy white perianth; light yellow frilled and fluted cup heavily edged deep apricot-orange. 3 for 25¢; 12 for 75¢; 100 for \$5.50.

9425 Croesus (*Shown in color on back cover*) Light canary-yellow perianth; broad, widely expanded, fluted crown of rich yellow stained orange and edged almost scarlet. 15¢ each; 3 for 40¢; 12 for \$1.40; 100 for \$10.00.

9431 Donatello Slightly reflexed light primrose perianth suffused canary-yellow; beautifully ruffled and frilled deep yellow trumpet. A most attractive variety. 20¢ each; 3 for 55¢; 12 for \$2.00; 100 for \$14.00.

9439 Gallipoli Citron-yellow perianth; yellow crown shading to vivid orange, deeply fluted to base with double frill effect at edge. Very large flowered. 40¢ each; 3 for \$1.10; 12 for \$4.00; 100 for \$30.00.

9433 Autocrat Primrose-yellow perianth; deep golden yellow cup which is somewhat expanded. A superb variety for any purpose. Its grace and beauty make it most desirable. 3 for 25¢; 12 for 75¢; 100 for \$5.50.

9552 Beat All The perianth is composed of very large, pure white petals from which stands out in bold contrast the long orange-yellow cup. A strikingly beautiful Daffodil; very free flowering. 25¢ each; 3 for 70¢; 12 for \$2.50; 100 for \$18.00.

Nobility

In this group, the cup or crown measures less than one-third the length of the perianth segments. For this reason they are often referred to as "Short-cupped Daffodils." They include varieties with yellow perianth and yellow cup, with or without red coloring on the cup, as well as varieties with white or whitish perianth and self-yellow, red-stained, or red cup. The most brilliant red crowned or cupped varieties will be found in the Barrii group.

The Poeticus Narcissus is an old-fashioned type which continues to gain in favor each year. The flowers have a rich spicy odor that is most pleasing. The perianth petals are snow-white and the small eye or crown is flattened, either yellow or lemon, and edged more or less deeply with scarlet-crimson and sometimes all scarlet.

Jonquils and Campernelles

Jonquils and their hybrids have a grace and charm that make them extremely popular. They are a distinctive type of Narcissus, the flowers being small, deliciously scented, and borne in clusters of two or more on strong stems. Some varieties produce their much prized blooms above the erect and rush-like foliage, while others are about level with the tops. They are perfectly hardy in the garden and highly recommended for beds, borders, naturalizing in woodlands, rock gardens, etc.; valuable for indoor culture in pots. Ideal for cutting, as the little flowers are of the greatest substance, keeping in perfect condition for a long time. Some gardeners apply the name "Jonquil" to the large trumpet Daffodils, but this is misleading. They are entirely distinct.

9479 Single Jonquil (Simplex) The true single Jonquil with the fragrance of the honey locust. Each stem carries a cluster of 3 to 8 rich golden flowers.

3 for 30¢; 12 for 90¢; 100 for \$6.50.

3 for 25¢; 12 for 70¢; 100 for \$5.00.

9482 Double Campernelle A very charming variety, bearing, on tall, graceful stems, 2 to 4 double, deep yellow flowers of great substance; last long in the garden or when cut.

3 for 30¢; 12 for 95¢; 100 for \$7.00.

9483 Golden Sceptre One of the finest of the new Jonquil Hybrids. Flowers are deep Jonquil-yellow, 3 in. or so across. The perianth is star-shaped, just a shade lighter in color than the trumpet, which is slightly rolled and flaring at the brim. The whole flower is of good substance, lasting well both in the garden and when cut.

3 for 30¢; 12 for 90¢; 100 for \$6.50.

9565 Tullius Hostilius New type of Jonquil hybrid; flowers as large as some of the smaller sized trumpet varieties. Of the Jonquil-yellow trumpet type; strong growing, with usually three flowers to a stem which are produced in the greatest profusion. The flowers have great lasting qualities; they are lovely in every way. An ideal variety for garden display, house culture or cut-flower use.

Polyanthus Narcissus

Also known as "Bunch Flowering" Narcissus
The popular flower for growing in the house during the winter and early spring either in soil or in pebbles and water

One of the easiest flowers to grow. Best results are obtained if your first plantings are not made until after Oct. 15. To have a continuous display, make successive plantings two or three weeks apart. We suggest you order enough bulbs early, as they will keep in perfect condition if put in a cool, dry cellar or spare room until needed for planting.

Water Culture: Put an inch or two of sand or pebbles in bottom of dish; set the bulbs upright and place sufficient pebbles around them to hold them in place. Fill dish with water and set in a dark, cool room until plenty of roots have formed, after which bring to a light but cool, free from frost, place.

Polyanthus Narcissus may also be grown in soil. They are not suited to garden planting except in frostless localities.

9460 Paper White Grandiflora

The Fragrant White Narcissus

The large, pure white blooms are borne in clusters and are highly prized for their beauty, fragrance, and the ease with which they can be grown. This accounts for their universal popularity.

LARGE BULBS: 12 for 50¢; 100 for \$3.50; 1000 for \$30.00.

9459 Soleil D'Or—Golden Yellow Narcissus

Often called the "Yellow Paper White," the sweet-scented blooms being rich golden yellow with a deep orange-red cup. May be grown in water and pebbles, but do best when grown in soil.

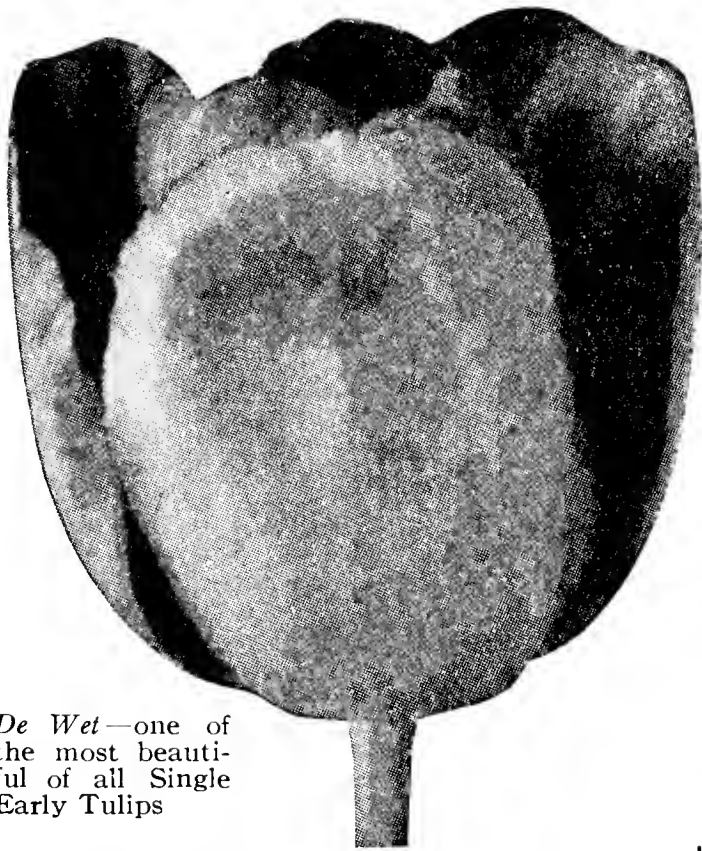

LARGE BULBS: 3 for 35¢; 12 for \$1.20; 100 for \$8.50.

A bed planted wholly to Pink Beauty is a grand sight

Double Early Tulips

The large, full, Peony-like flowers of the Double Early Tulips will make a most colorful display in formal beds or garden borders several weeks before the Darwin, Breeder and Cottage types come into bloom. They make a compact, stocky growth 10 to 12 in. high. Groups or scattered plantings here and there among perennials are always showy. The Double Early Tulips also do well planted in pots or pans for indoor winter blooming.

General Cultural Directions for all Tulips

except Botanical (Species). Tulips should not be grown in soil in which they had been grown the last two seasons. Select a new location. Do not use fresh manure at planting time; well-rotted manure or bone meal may be used. Plant bulbs 5 to 6 in. deep and 6 in. apart.

Indoors: A mixture of $\frac{2}{3}$ good, clean garden soil and $\frac{1}{3}$ leaf mold to which a little bone meal has been added will give the best results. A 6-inch pot will hold about 6 bulbs. Place bulbs about 1 in. apart each way. Cover with an inch of soil, and water thoroughly; then put pots in a cold-frame or heel-in in the garden for eight to ten weeks to force root development. Bring pots indoors, first in a cool location and gradually to the average living room temperature. For full Cultural Directions, ask for the Burpee Leaflet No. 31, "Bulbs for Winter and Spring Blooming."

Rembrandt Tulips

9333 Mixed Colors The flowers of Rembrandt Tulips resemble those of the Darwins, but instead of being of solid colors, they are beautifully striped, feathered or flaked in two or more colors. They bloom in May, grow 18 to 22 in. high, and are sometimes referred to as "Striped Darwins." We offer a splendid mixture of many varieties of this artistic and striking class of Tulips.

3 for 25¢; 12 for 85¢; 100 for \$6.00; 1000 for \$55.00.

May Flowering or Old English Cottage Tulips

Cottage Tulips are, perhaps, the most permanent of all Tulips, blooming in early May after the Early Singles have passed, hence the name of "May Flowering." The term "Cottage" is of recent origin and so called because so many were planted around the country homes and cottages of England. As a class they are rich in the more delicate and artistic shades of yellow, orange, fawn, salmon, old rose—colors missing to a great extent in other late Tulips.

Cottage Tulips are as varied in their range of colorings as the Darwins but more varied in form, being mostly long and oval-shaped, many with gracefully reflexed petals. Stems are long and not so stiff as the Darwins or Breeders. Excellent for cutting and unsurpassed for garden decoration and especially for grouping among shrubbery. Except for a few varieties, they are not recommended for growing indoors. Heights given for each variety are average and may vary.

Tall Giant Darwin Tulips

Darwin Tulips are probably the most popular of all late Tulips; their chief characteristics are the perfect cup-shaped flowers, fleshy petals, tall stems, and bright colors—scarlet, crimson, rose, pink, violet, purple, slaty blues, blue-violet, lavender, white and golden yellow. They are wonderful for planting in masses in beds or borders, in clumps of 12 or more here and there in the hardy perennial border, or in the foreground of shrubbery, and what could be lovelier for cutting?

For a full range of colors in late Tulips, the Ideal Darwin, Breeder and Cottage varieties should be included in your plantings, as each class has its own range of colors, and all three bloom at approximately the same time. The height given for each variety is average, and may vary.

Parrot Tulips

Gemma, Fantasy and Lady Derby are taller growing, and the larger flowers are held erect on long, strong stems. Parrot Tulips are entirely distinct, and one of the most interesting plants you can grow. May flowering.

9338 Coffee Color (Café Brun) Deep yellow, striped and stippled orange-brown.

9339 Cramoisi Brilliant (Crimson Beauty) Rich blood-crimson with blackish markings. Large.

Early Spring Flowers

Often before the snow has melted the ever welcome little Snowdrops are in bloom, and while it may be still rather drab outdoors, the showy Chionodoxa, the gaudy Crocus, the lovely Scillas, and the pretty Grape Hyacinths are blooming, reminding us that another spring is here. These early flowers surely have a charm and appeal all their own. Plant them liberally and try some varieties that you have never had before; many are seen far too seldom—Calochortus, Camassia, Erythroniums, Fritillarias and other lovely subjects.

Often referred to as Fairy Lanterns; the shape of the flowers and the way they hang on the stem suggest the name. Plants are much branched and bear quite a number of exquisitely tinted flowers on long, slender, leaf-wrapped stems.

Fine subjects to naturalize in the rock garden or in shaded woods, but they must have perfect drainage. Plant bulbs 2½ to 3 in. deep, and 3 to 6 in. apart. Crocus will grow in many places—in the lawn, in flower borders, in rock gardens, edge of shrubs, on the slopes of terraces, in sun or shade, and even under trees. The best position is where they will receive the sun for only part of the day. For showy effect plant bulbs 3 to 4 in. apart, 2 in. deep. Easter Lilies

Popular throughout the world, loved and admired by everyone. We offer three varieties that are *ideal for indoor growing*—Harrisii, Longiflorum giganteum and Erabu. Use a 5 or 6 in. pot, place bulb loosely in rich, porous soil so that it is barely covered and the soil gently but firmly set. Keep in a cool, dark but airy place, free from frost, until bulbs are well-rooted; afterwards bring to the light and grow on in a temperature of not more than 60°. Ideal garden subjects in frost-free locations.

8614 Erabu

(Japanese Easter Lily)

An improved type of the well-known *Lilium Formosum*, with uniform dark colored stems. Often called "Black-stemmed *Formosum*." Plants are of healthy, strong growth, about 3 ft. high, and bear their magnificent flowers in whorls at the top of the strong stems. Flowers are large, trumpet-shaped, 6 to 8 in. long, pure waxy white and sometimes tinged with green near the base; the anthers are yellow, which adds to the beauty of the blooms.

Erabu Lily is largely grown for Easter forcing, having practically replaced the old *Formosum*. They are delightfully fragrant and if cut when partially open, can be kept for two weeks. Gets its name because nearly all of the bulbs are grown in the Erabu Isles. Ready for delivery in October.

30¢ each; 3 for 85¢; 12 for \$2.95;
100 for \$22.00.

Giant Easter Lily

8612 Giant Easter Lily

We handle the "Northern or Saitama grown" bulbs as we consider them the best. They are ready for shipment in November.

30¢ each; 3 for 85¢; 12 for \$2.95; 100 for \$22.00.

Our bulbs are genuine Bermuda grown and ready for shipment from August to December.

Perennial Flower Seeds—

Perennial Flowers are the hardy, permanent ones that live for years. In frost-free sections, seeds may be sown at almost any time of the year; in mild climates or in localities where winters are not too severe, seeds may be sown in the fall—the earlier the better, so that plants will be of good size before freezing weather sets in. After the ground is frozen hard, cover the bed with a light mulch of straw or strawy manure to prevent the plants from being heaved out by alternate freezings and thawings. Cultural directions are given on every bag. The Burpee leaflet, "Perennials from Seed," sent **Free** upon request.
